Computer Science major at Winston Salem State University with a drive to further my knowledge and skill set in software development. Extensive background in technology, electronics, and working in fast-paced and high stress environments. Seeking an internship with a major tech company to gain experience in a real-world working environment.

Experience

Recreation Billiards/Whiskey Box, Winston-Salem, NC – Bartender   May 2019-March 2020

Bartender at a late-night sports bar targeting a local regular base, featuring craft cocktails and musical acts. Utilized Micros POS; managed large, demanding crowds; perfected the ability to make a positive and lasting impression with very little time to spend on each guest.

Hutch & Harris, Winston-Salem, NC – Bartender   Oct 2015-May 2019

Senior bartender at a fast-paced local restaurant with a high-volume, late-night bar crowd. Developed proficiency in Micros POS; trained multiple bartenders; worked as acting manager in key-holding shifts (responsibilities included employee management, deposit and payroll functions, and inventory); built a loyal group of happy hour regulars; established excellence in conflict resolution, often serving as liaison between kitchen, servers, customers, and management.

Infinity Medical Marketing - Freelance   Mar 2015

Worked freelance for a marketing company building websites for medical clients. Developed responsive design websites from Photoshop documents into HTML and CSS. Formatted websites to locally hosted Wordpress with MAMP.

School of Audio Engineering, Nashville, TN – Lab Instructor   Feb 2012-Mar 2015

Supervised students' coursework and ensured that studios and classrooms were in updated and streamlined working order. Acted as the conduit between students, teachers, and administrators to communicate course requirements and learned-knowledge application throughout the school. Guided, tested, and graded student projects in live sound, sound design, and audio applications throughout the school.

- Maintaining and repairing systems hosting Pro Tools, Ableton Live, Logic Pro, Garageband, Reason, NI Massive, AutoTune EVO and Wavelab.
- Creating curricula and testing students on consoles including Mackie1604, Presonus StudioLive 24:4, AMR 24, Neve 88r and SSL 9000J.

Education

Winston Salem State University, Sophomore   June 2021-present

Computer Science major with minor in Data Science. Working with Java, python, Google collab, and studying cyberethics Classes include:

- Computer Programming I   Computer Science Colloquium   Precalculus
- Principles of Financial Accounting   Introduction to Political Science

Nashville Software School, Cohort 7   Oct 2014-Mar 2015

An intensive, six-month, coding boot camp, focused on full-stack web and application development. Completed an immersive curriculum that detailed all aspects of development in the latest tools and programming languages. Achievements include:

- Planning, building, testing, developing, and deploying applications from start to finish.
- Implementing test-driven front-end development, with a heavy focus on HTML, CSS and Javascript before jQuery.
- Executing back-end development, emphasizing C# on the .NET Framework with an AngularJS client side.
